Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Glasshouse	Tomatoes (round)	Mediex, Pitenza	Morocco, Spain	Amber	Steady volume but a lot of mixed quality as most crops are entering their last cycle, and quality is now suffering. Do not expect any change for the time being other than becoming more challenging as we head towards the overlapping period at the end of the month.
	Tomatoes (beef)	Venecia, Maximo	Belgium, Morocco, Netherlands, Spain	Amber	Limited volume continues, challenging quality and sizes. Overlapping period towards the end of this month.
	Tomatoes (plum)	Caniles	Morocco, Spain	Amber	Volumes dropping from all winter sources and the quality is becoming rather mixed. Anticipate volumes to keep decreasing from now to the end until on the month until the Dutch production commences at some point next month.
	Tomatoes (vine)	Barbarela	Morocco, Spain	Amber	Volume easing back and the quality too has deteriorated slightly though still holding reasonably well. Large fruit limited.
	Cherry Vine		Morocco, Spain	Green	Decent volume available.
	Cherry	Genio	Egypt, Morocco, Senegal, Spain	Green	Good availability. Yields easing back slightly.
	Heritage / INCA	Various	Spain	Green	A little bit more challenging for some of the varieties, though the current availability and quality is steady.
	Baby Plum (mixed)	Orange & Red	Morocco	Green	Good quality.
	Marzanino	San Marzanino	Spain	Green	Subject to availability.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Glasshouse	Peppers (Bell)	Eglantine, Saitama	Spain	Amber	The unusual warm winter has now taken its toll on most crops. Production is dropping not just in terms of volume but also quality. Higher percentage of class 2 while class 1 is also now almost non-existent. Growers are now extremely vigilant and whilst quality coming through is just ok for the time of the year, the situation will become more difficult as the month goes on. A few early pickings taking place in Holland but volumes very limited.
	Peppers	Sweet Pointed	Morocco, Spain	Green	Steady volume available and quality remains good from both Spain and Morocco.
	Cucumber	Proloog mainly	Morocco, Netherlands, Spain, UK	Amber	Steady volume available. A lot of the old crops are being pulled out and some of the new spring crops are only just starting. However, anything left from the old crops, quality is mixed, i.e. weaker fruit / shorter shelf life. Morocco's production is rapidly coming to an end. Dutch and UK production is slowly increasing every week.
	Chillies Green Bullet	Fresno	Kenya	Green	
	Sweet Pointed Peppers		Morocco, Spain	Green	Stable supply, good quality, isolated green tinge.
	Chillies Red Bullet	Fresno	Kenya	Amber	Virus issues reducing volume though enough to cover current orders.
	Chillies Green Birds Eye	Demon	Kenya	Green	
	Chilli	Jalapeno	Morocco, Portugal, Spain	Amber	Lower availability. Overall quality is good but at this time of the year see a break in colour rather quickly if yet coming from older crops.
	Chilli	Padron	Morocco, Spain	Amber	Lower volumes. Overall quality is good but at this time of the year see a break in colour rather quickly if yet coming from older crops.
	Aubergine		Belgium, Kenya, Netherlands, Spain	Green	Good volume across all sizes. Dutch & Belgium production beginning.
Courgette	Tosc, Lagoda	Spain	Green	Volume easing back with the cooler weather conditions though enough to meet supply. Overall quality is good.	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Lettuce & Leaves	Iceberg		Spain	Green	Overall production has been improving. Quality remains good.
	Little Gem		Spain	Amber	Overall production has been improving. Quality more challenging on the little gem and has suffered tip burn and dry outside leaves leading to shorter shelf life.
	Romaine	Magistral, Keope, Actina	Spain	Green	Overall production has been improving. Quality remains good.
	Batavia		France, Spain	Green	Overall quality is still decent but becoming more difficult.
	Oakleaf	Macia	Spain	Green	As above.
	Lollo Biondi	Libeccio	Spain	Green	As above.
	Lollo Rosso		Spain	Green	As above.
	Fine Endive	Fina	Spain	Green	As above.
	Radicchio	Rubero	Italy	Green	
	Round	Various	UK	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Lettuce & Leaves	Pak Choi		Spain	Green	
	Chinese Leaf		Netherlands	Green	
	Baby Leaf Green Kale		Italy	Green	
	Bulls Blood		Italy	Amber	Medium risk for Cercospora (small red or brown-black flecks with reddish borders expand to circular spots with ashy grey centres).
	Red Chard	Firefresh, Abi, Galaxy, Venus	Italy	Amber	Medium risk for Cercospora (small red or brown-black flecks with reddish borders expand to circular spots with ashy grey centres).
	Mizuna		Italy	Green	
	Watercress		Spain	Green	
	Spinach	Helios, El Halo, El Fiurio, 1714,	Italy	Amber	Dry/windy weather is influencing the crop. There are no extras and has a high % of mixed leaf and leaf spotting due to the winds and rain.
	Rocket Wild	Sele, Juno, Yuma, Rubicon	Italy	Amber	Black spotting (bacterial leaf spot) observed on some of the leaves and isolated minor yellowing. Possible reduction in availability due to the drop in temperatures.
	Rocket		Italy	Amber	Quality is being affected by rain, small % of large leaf.
Corn Salad		Italy, France	Amber	Low availability.	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Potatoes	Mids.	Nectar, Orchestra, Melody, Divaa, Cultra.	UK	Red	Very little change, only more press coverage that the UK could run out of potatoes at the end of the season. Finding supplies remains hard, specifically Mids. Some growers keeping Mids as seed very short for planting next season. Spot market for a lot of maincrop for the best material still upwards of £500 pt ex farm. A lot packers looking at imports, and some have already had several loads of Egyptian Saphyria. Mids. availability particularly scarce as lowered sizing by the retail trade has swallowed up most of the 40-45mm Mids. This will not improve until July-August.
	Bakers	Nectar, Lanorma, Alison, Orchestra, Melody, Jelly, Cutra, Divaa	UK	Amber	As above
	Chippers / Roasters	Maris Piper, Markies, Sagitta, Tyson	UK	Amber	Piper showing flecks of scab and internal bruising.
	Reds	Desree, Mozart	UK	Green	
	Ware, Mashers	Various	UK	Amber	Still concern that there is not enough potatoes in Europe to match consumption. Plus, consumption has generally improved as whole head potatoes are still good consumer value, and until recently have not got overly expensive at retail levels. However, over the last month that has changed, and some retail prices have increased, plus retailers are lowering pack sizes to make the crop last. Making the crop last may well be exasperated by continuing waterlogged fields holding back planting of the early season new season material. The UK is now seeing a certain number of imports arriving to supplement likely supply gaps. Of course this is making non contracted material even more expensive farm values. With stronger demand from recent seasons, packers have been trying to build stocks for the next few months. Plans for next season are well under way which looks like being another short season as available land and seed is making the market nervous. Current spot market values likely to remain very high, increasing further, particularly for May, June and early July, hence demand for imports at fixed costs for this period.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Potatoes	Premium Chipping	Agria	UK	Amber	See comments in 'washers / mashers.'
	Salads	Charlotte, Jazy, Gwenne	UK	Amber	The main variety will be less of Charlotte and now the majority of Jazy. It appears to be storing OK overall. Some stronger demand for salad potatoes over the last month or so, the market appears currently less volatile than maincrop whites. Long-term; Jazy will dominate. May possibly be sampling some imported material. Charlotte seed availability a concern, meaning Jazy will dominate even more looking forward.
	Baby Salads	Maris Peer	UK	Red	The UK potato area planted in spring of 2023 for the 2023/2024 crop was reduced. Planting was late due to the cold wet spring weather and harvesting in Autumn 2023 was further delayed due to wet weather conditions. Not all crops were harvested. Potentially the lowest UK Potato crop on record means that overall availability is tight.
	Sweet	Beauregard	Egypt, USA	Green	
	Specialist Salads	La Ratte	UK	Green	Current stocks ok.

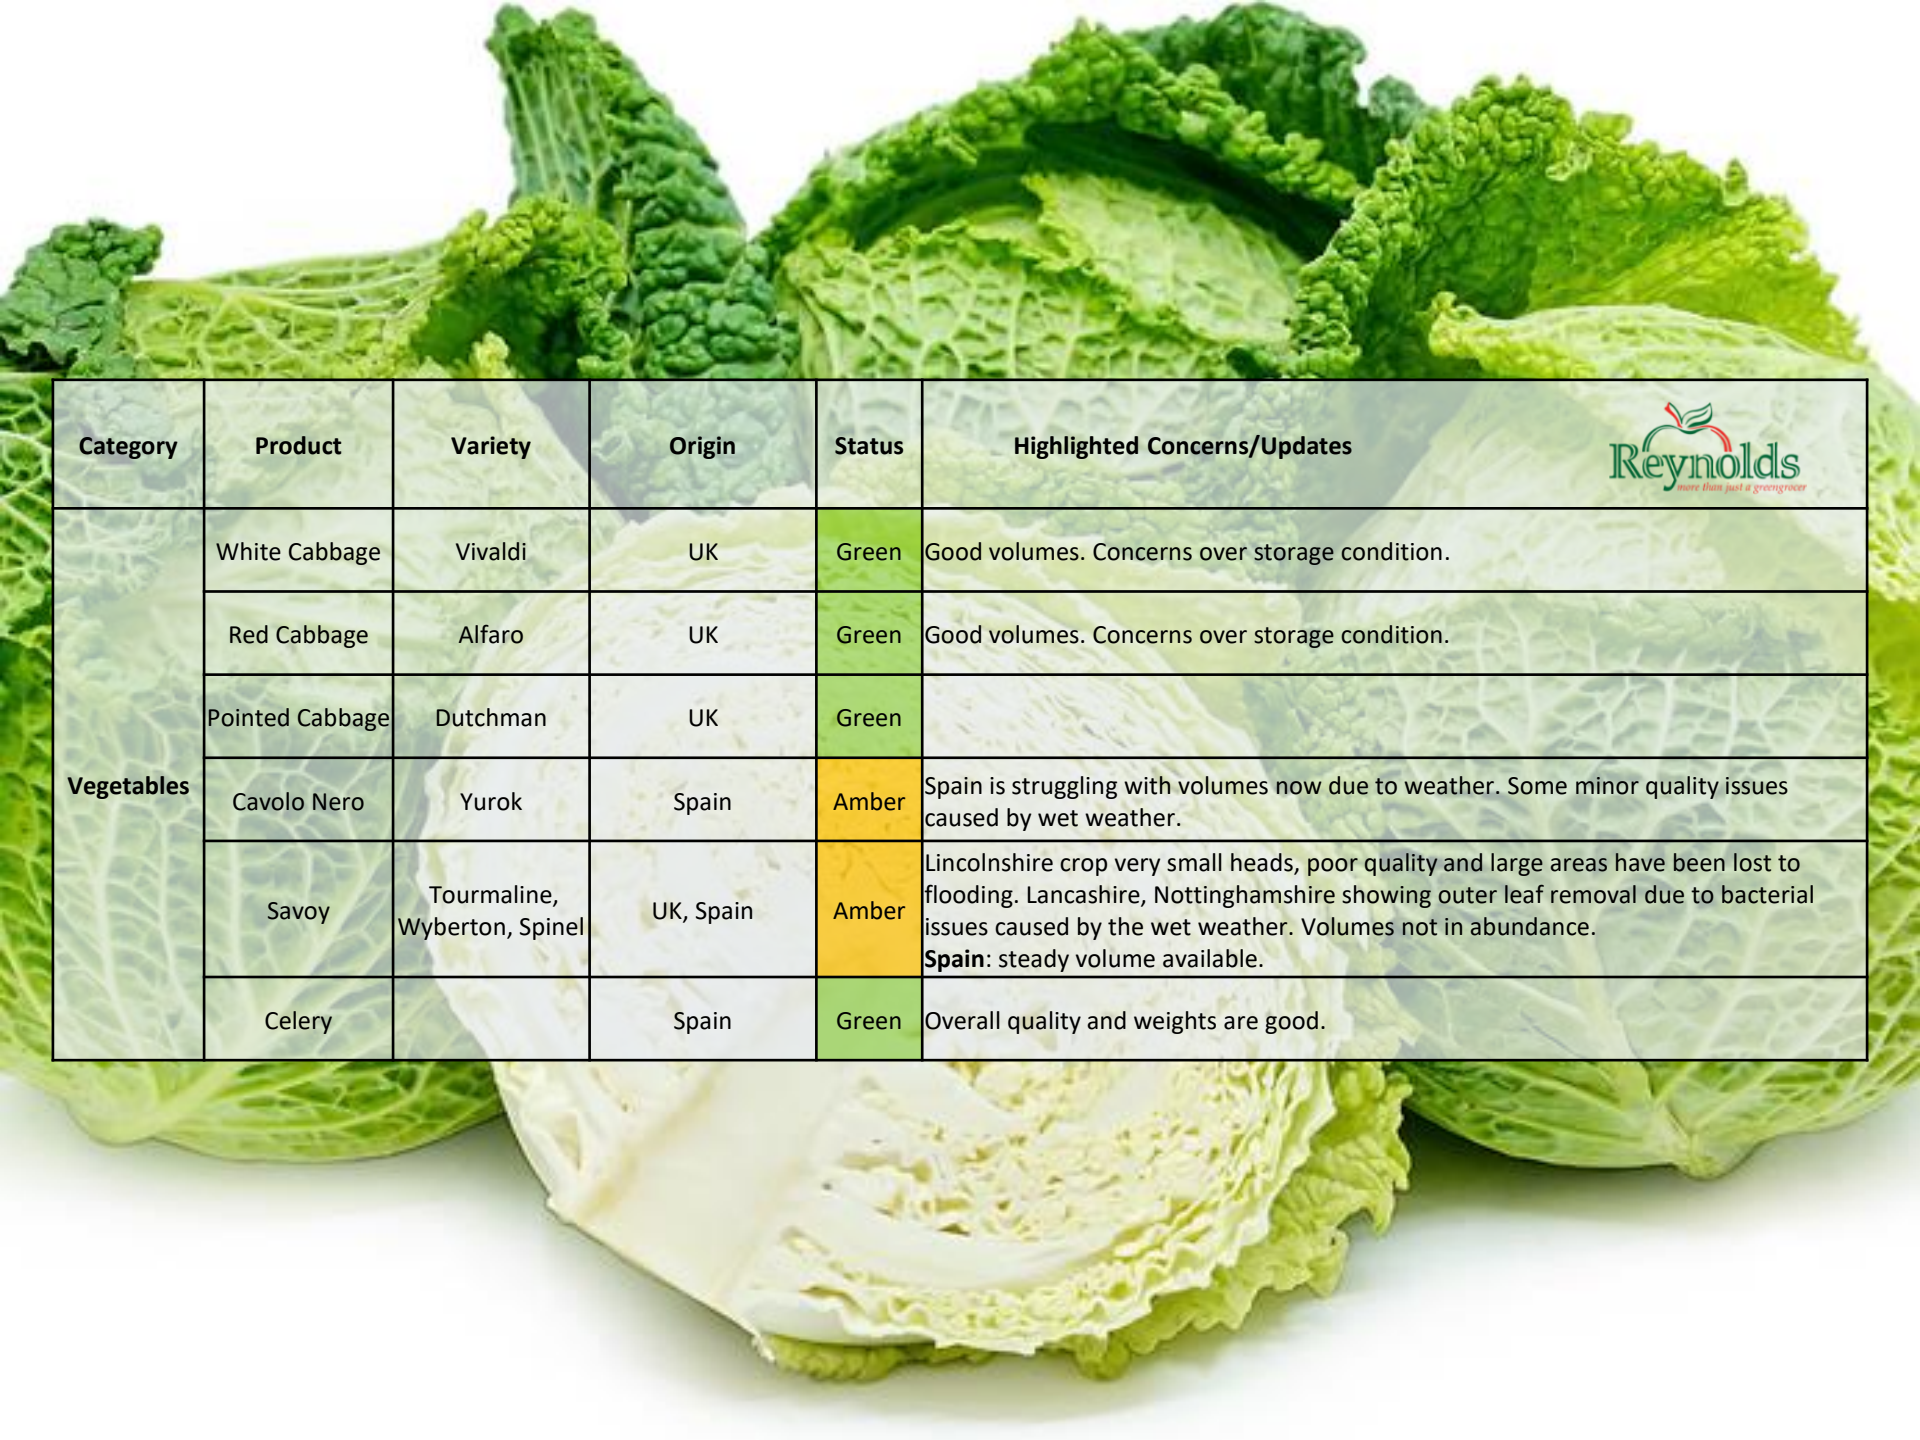

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Onions	Brown		Netherlands, UK	Green	<b>UK:</b> Still evaluating store losses on sets. Some internal issues being spotted but nothing at a level to cause concern at this stage.
	Red		Netherlands, UK	Green	<b>UK:</b> Short term availability is good. Longer term still needs to be assessed now crops are harvested and in store. Quality ok.
	Shallot	Banana	France	Green	
	Shallot	Round	France	Green	
	Spring	White Lisbon	Egypt	Green	<b>Egypt:</b> Quality remains good; Next week's boat is running late. <b>UK (over-wintered):</b> Due to the wet weather recently, we have delayed the start until week 13 due to the rains

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Vegetables	Spring Greens	Verve, Winter Supreme, Winter Special	UK	Amber	Based on the current growing conditions. Availability remains tight, with smaller yields and some spotting on leaves.
	Cauliflower	Aron, Delon	France	Green	
	Broccoli	Parthenon, Ulisses, Larsson	Spain	Amber	Spanish crops have begun to ease back. This has been more noticeable in the continent than in the UK, but it will become more evident towards the end of the months. Anticipate a drop in volume from now. UK production is due to start later due to the wet, winter weather causing planting delays.
	White Chicory	Topscore	UK	Green	
	Red Chicory	Festive	UK	Green	
	Butternut		Brazil, Egypt, South Africa	Green	Transitional period between Northern and Southern hemisphere. Switching into new season southern hemisphere, Brazil, and South Africa.
	Leeks		Belgium, Netherlands, Spain	Amber	An improvement from previous weeks following decent weather condition. There is still mix quality.
	Kale	Reflex	UK	Amber	UK season finishing, switching into Spanish.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Vegetables	White Cabbage	Vivaldi	UK	Green	Good volumes. Concerns over storage condition.
	Red Cabbage	Alfaro	UK	Green	Good volumes. Concerns over storage condition.
	Pointed Cabbage	Dutchman	UK	Green	
	Cavolo Nero	Yurok	Spain	Amber	Spain is struggling with volumes now due to weather. Some minor quality issues caused by wet weather.
	Savoy	Tourmaline, Wyberton, Spinel	UK, Spain	Amber	Lincolnshire crop very small heads, poor quality and large areas have been lost to flooding. Lancashire, Nottinghamshire showing outer leaf removal due to bacterial issues caused by the wet weather. Volumes not in abundance. <b>Spain:</b> steady volume available.
	Celery		Spain	Green	Overall quality and weights are good.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Root Vegetables	Carrot	Nairobi, Norwich, Polydor, Octavo, Eskimo, Norfolk	UK	Amber	Variable yields following the substantial rainfall. Frost damage, water damage and rots coupled with hard lifting conditions in Scotland continue to be our main challenges.
	Celeriac	Merga, Yara	UK	Green	No issues.
	Swede	Magres, Tweed	UK	Green	
	Mooli		Italy	Green	
	Radish		Netherlands, Italy	Green	
	Beetroot	Candy, Golden, Red	UK, Netherlands	Green	
	Vac Pac Beetroot	Red	Lithuania	Green	
	Parsnip	Picador, Panorama	UK	Amber	Variable yields following the substantial rainfall. Canker and bruising coupled with hard lifting conditions continue to be the main challenges. Spanish circa week 18.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Exotic Veg	Tender stem Broccoli	Inspiration F1	Egypt, Kenya, Spain	Amber	<b>Kenya:</b> Rains have stopped, and conditions are now very warm leading to some discolouration. Managing programmed volumes but not huge excess available <b>Egypt:</b> availability improving. <b>Spain:</b> steady volume available.
	Asparagus		Mexico	Green	
	Fennel	Augusto, Narciso, Tiziano, Tiepolo	Italy	Green	
	Fine Beans		Kenya	Amber	Crop struggling a little during very hot temperatures. Volumes a little tight
	Beans T&T		Kenya	Amber	As above.
	EXF Beans	Samantha	Kenya	Amber	As above.
	Sugar Snap	Sugar Lord	Kenya	Amber	As above.
	Mangetout	Sweet Horizon	Kenya	Amber	As above.
	Okra	Kijani	Kenya	Green	
	Turmeric		Peru	Green	
	Lemon Grass	Lemon	Kenya	Green	
	Chestnuts Vac Pack		France	Green	
	Sweetcorn Vac Pack		Spain	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Exotic Vegetables	Baby Carrot		Kenya, RSA, Spain	Green	
	Baby Leek		RSA	Green	
	Baby Aubergine	Black Beauty	Kenya	Green	
	Baby Courgette		RSA	Green	
	Baby Beetroot		RSA	Green	
	Baby Sweetcorn	SG18	Kenya	Green	
	Baby Fennel		RSA	Amber	Low availability.

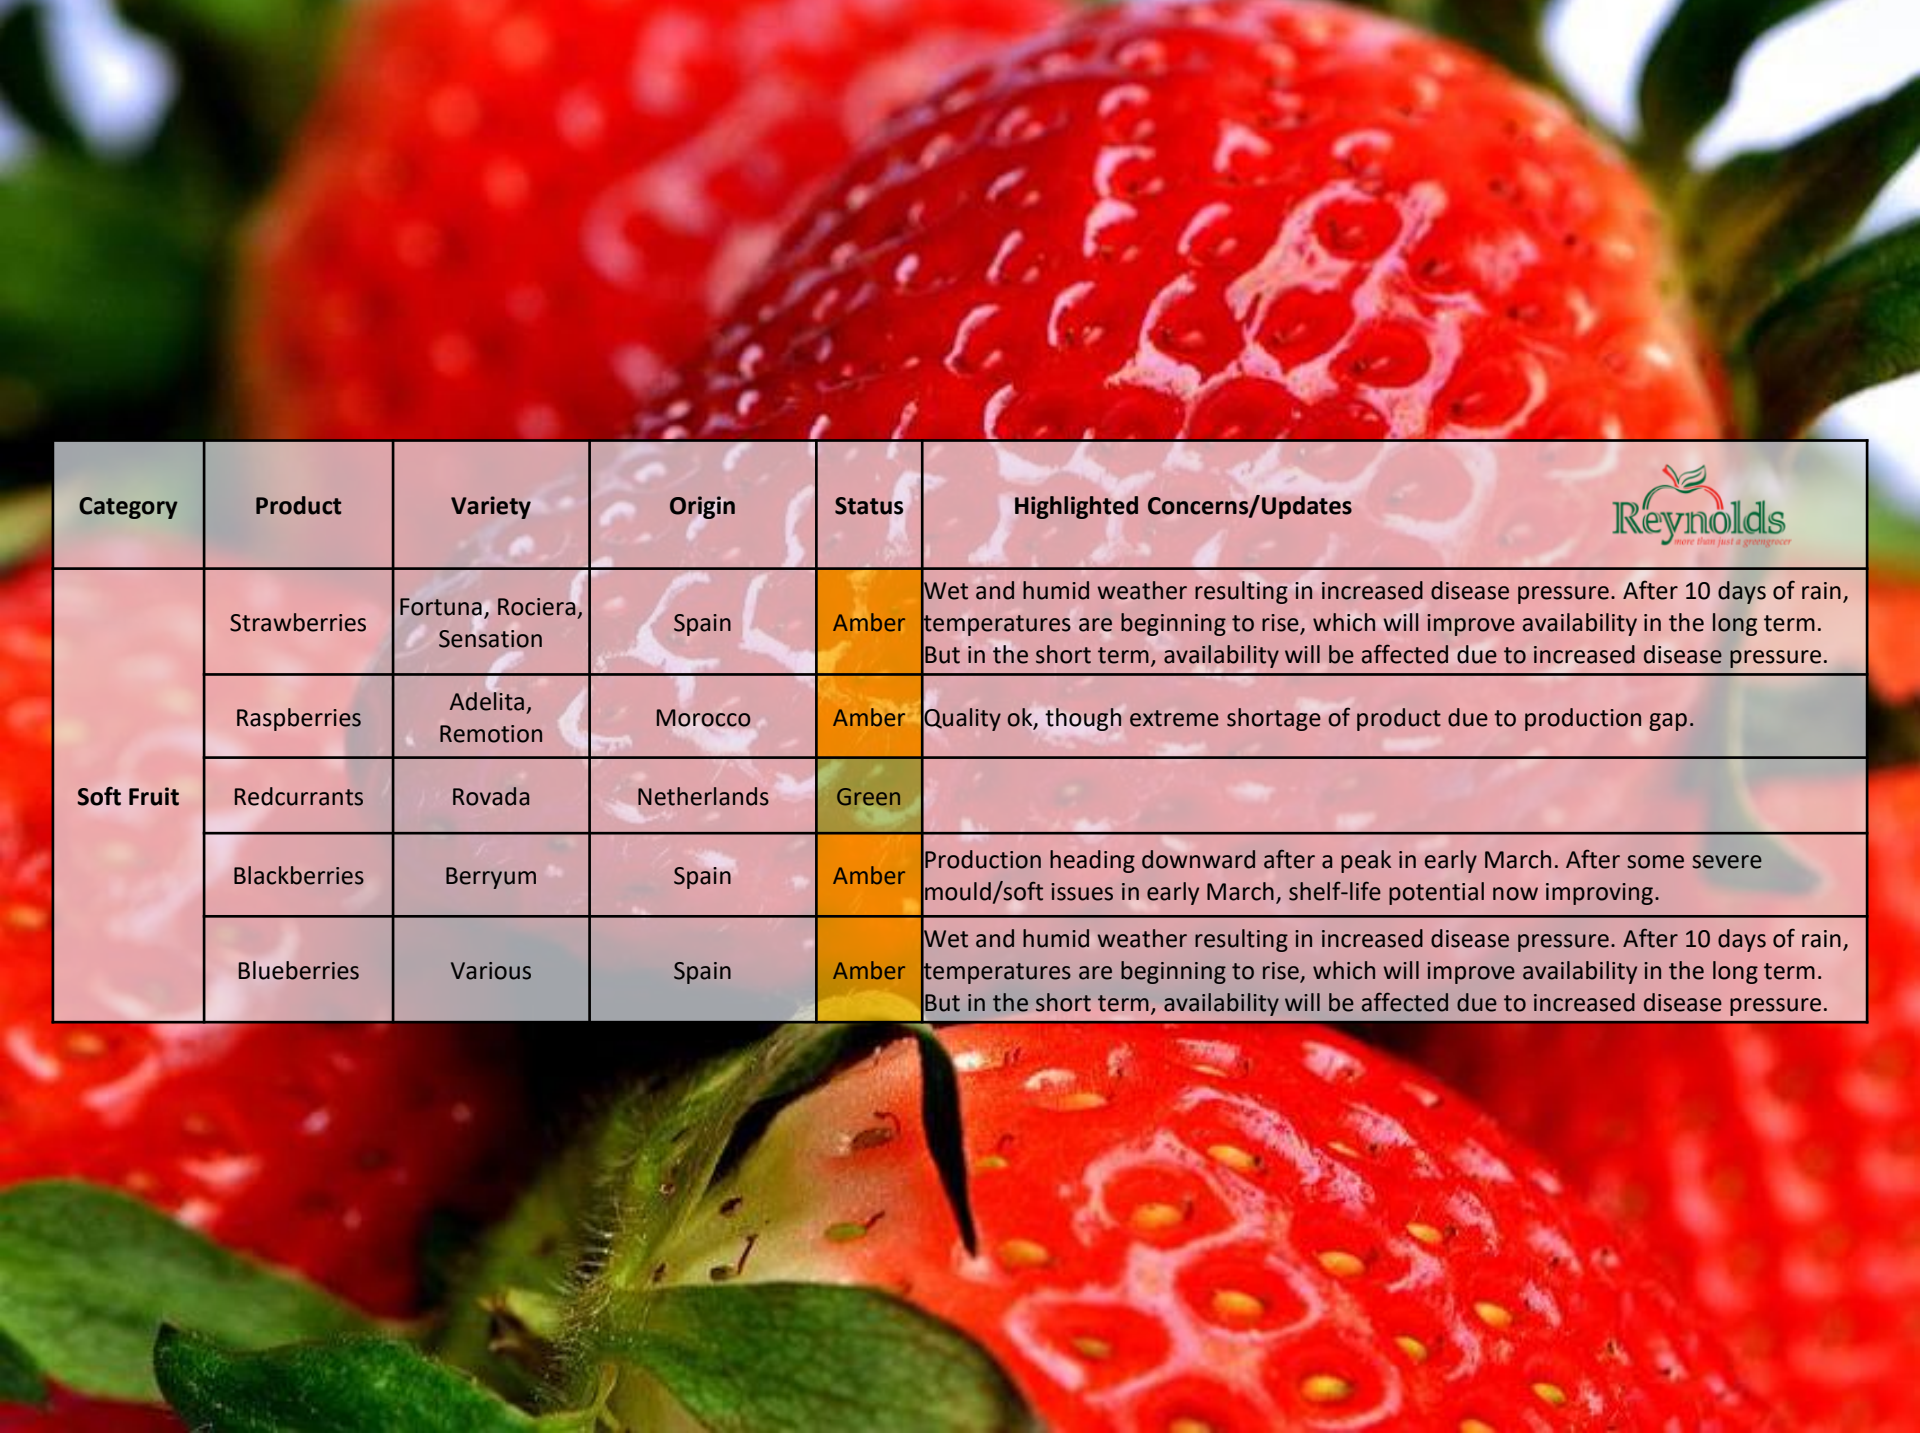

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Garlic	Garlic (peeled)		Spain	Green	
	Bulbs		China	Green	
Ginger	Ginger		Brazil	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Mushrooms	Mix		Various	Green	
		Dried Cep	Various	Green	
	Wild		Various	Green	
		Shitake	Belgium, Netherlands, Ukraine	Green	
		Trompette Dried	Various	Green	
		White Shimeji	China	Green	
		Brown Shimeji	China	Green	
	Dry Wild Mix		Various	Green	
		Eyrngi	China, Germany, Korea	Green	
		Enoki	Demark	Amber	Potential availability issues.
		Button	Ireland, Poland	Green	
		Brown Chestnut	Ireland, Poland	Green	
		White Agaricus bisporous	Ireland, Poland	Green	
		White Oyster	China, Germany, Korea, Poland	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Soft Fruit	Strawberries	Fortuna, Rociera, Sensation	Spain	Amber	Wet and humid weather resulting in increased disease pressure. After 10 days of rain, temperatures are beginning to rise, which will improve availability in the long term. But in the short term, availability will be affected due to increased disease pressure.
	Raspberries	Adelita, Remotion	Morocco	Amber	Quality ok, though extreme shortage of product due to production gap.
	Redcurrants	Rovada	Netherlands	Green	
	Blackberries	Berryum	Spain	Amber	Production heading downward after a peak in early March. After some severe mould/soft issues in early March, shelf-life potential now improving.
	Blueberries	Various	Spain	Amber	Wet and humid weather resulting in increased disease pressure. After 10 days of rain, temperatures are beginning to rise, which will improve availability in the long term. But in the short term, availability will be affected due to increased disease pressure.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Citrus	Lemon	Primofiori	Spain	Amber	Mild temperatures, no winds or rain. Night temperatures will allow the wounds caused by the winds of previous weeks to close.
	Orange	Valencia	Egypt	Green	
	Easy Peeler	Nadorcott	Spain	Green	
	White Grapefruit	Marsh	Israel	Amber	
	Red Grapefruit	Star Ruby	Turkey	Green	
	Limes	Tahiti	Brazil	Amber	Delayed containers presenting a challenge to the quality of the product. Vessels not stopping off in the UK but heading straight to Europe. Increased reliance on feeder vessels to bring the containers to the U.K.
Grape	White	Thompson	India	Amber	Good quality. Vessel delays due to vessels not travelling through the Suez Canal.
	Red	Crimson, Scarlotta	RSA	Amber	Stored grape. Last containers of the season are in the water.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Exotic Fruit	Passion Fruit	Edulus	Colombia	Green	
	Green Papaya		Brazil	Green	
	Papaya		Brazil	Green	
	Figs		Brazil	Green	
	Physalis		Colombia	Amber	Low availability, though enough to cover current orders.
	Kiwifruit	Hayward	Greece	Green	
	Dates	Medjool	Israel	Green	
	Pomegranate	Wonderful	Peru	Green	Overall quality is good, strong sugars as the orchards are in the north of Peru.
	Mango	Kent	Peru	Amber	External appearance may be slightly scruffy, due to anthracnose spotting, but the internal flesh is not affected. The Peruvian season remains very short of volume, and this is not expected to change.
	Banana Leaf		Thailand	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Melon	Cantaloupe	1044, Caribbean Gold, Caribbean Smile, Domador, Don David, DRG 3228, Orange County, SV1044, SV3159ML, Zanaz, Zucard	Brazil, Costa Rica, Honduras	Amber	Issues with availability from source and vessel delays.
	Yellow Honeydew	Berlin, Dali, Gold News, Goldex, Jadeal, Manda Chuva	Brazil, Costa Rica, Honduras	Amber	Low levels of light sporadic tea staining, and stalk mould and some scruffiness seen. Issues with availability from source and vessel delays.
	Galia	Bossa, DRG 3228, McLaren, NUM 67007, SVM G5224	Costa Rica, Honduras	Amber	Light pepper spotting noted. Issues with availability from source and vessel delays.
	Watermelon	6411, 8881, 39277, 50044, 50046, 051, ACX 6177, Ana, Arriba, Durlinda, Eclipse, Embassy, Essence, Estona, Excite- 50027, Exclamation, Expert, Felipe, Harmonium, Lola, Mielhart, NUN 31810, NUN 32007, NUN 32010, Papagaio, Quetzali, Shoreline, Style, Tri Durlinda, Troubadour, Yellow buttercup.	Brazil, Costa Rica, Honduras, Panama	Amber	Rots, stalk rots and stem end mould. Issues with availability from source and vessel delays.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Top Fruit	Apple	Braeburn	France, Italy, Serbia	Amber	France, Italy: Generally good colour, but increased shrivel prevalent. Some isolated stalk punctures though dry, which is common in Braeburn variety. Quality is set to decline further as we end the season, staff continue to pick out visual defects online during packing. With limited availability, 6kg average is only available now until the end of the tender in early May.
		Granny Smith	Serbia	Green	
		Pink Lady	France, Italy	Green	Good quality arrivals, eating well with good PSI and brix, minor bruising seen.
		Golden Delicious	Italy	Green	No issues predicted.
		Red Delicious	France, Italy	Green	Minor bruising seen on arrival. Availability has improved and should be maintained.
		Royal Gala	UK	Green	Sweet eating and no quality issues predicted. Currently good. Looking to tighten up in April.
		Bramley	UK	Green	Good quality with strong pressures. Contingency sourcing from Northern Ireland through to June.
	Plum	Angelino	South Africa	Amber	45 mm+ diameters. 50 mm + diameters already short in South Africa.

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Pineapple	Pineapple	MD2	Costa Rica	Amber	Continuing delays on vessels due to winter Atlantic storms will place pressure on shelf life of stock once arrived. Availability of large fruit size 6/7s is tightening as average warmer temperatures result in crop being harvest before sizing is achieved and a requirement for crop to be harvested at a greener colour stage for transit times (shelf life). Smaller sizes 9/10s are ok on availability due to this.
Bananas	Banana	Cavendish	Costa Rica	Amber	Last several weeks, weather conditions have been mainly cloudy days and low temperatures (totally normal this time of year) which makes it difficult for fruit to gain grade (width).
			Guatemala	Green	
			Colombia	Green	
			Belize	Green	
			Dominican Republic	Green	
			Ecuador	Green	
			Panama	Green	
			Nicaragua	Green	
			Ivory Coast	Green	

Category	Product	Variety	Origin	Status	Highlighted Concerns/Updates
Avocado	Avocado	Hass	Colombia	Amber	No issues on initial containers of Traviesa (second) crop. Sizing of fruit is small, limited within specification size.
			Morocco	Green	Great eating qualities.
			Spain	Amber	Export has ended, final stock on site.
			Peru	Amber	No issues on initial containers. In third week of arrivals, volumes increasing at source.
			Israel	Green	Mature fruit is ripening quickly, however eating good. Spread of sizing has improved.
